(54) METHOD AND DEVICE FOR PAYMENT MANAGEMENT AND PROGRAM  
RECORDING MEDIUM WITH THE METHOD RECORDED THEREON

(57)Abstract:

**PROBLEM TO BE SOLVED:** To realize a method and a device for payment management and a program recording medium which reduces transaction risks.

**SOLUTION:** The method is comprised of a service enterpriser, an ordering person, and an order receiver, which are connected via a network, and the service enterpriser mediates settlement between the ordering person and the order receiver from the standpoint of the third person. In this method, the ordering person pays beforehand consideration to be paid to the order receiver to an account designated by the service enterpriser, and the service enterpriser transfers consideration paid to the account to the designated account of the order receiver on behalf of the ordering person to perform settlement, when confirming delivery from the order receiver to the ordering person. Consequently, trouble where delivery is performed but counter value is not paid is avoided on the order receiver side, and trouble that consideration has been paid but delivery is not performed is avoided on the ordering person side, and as a result, transaction risks are reduced.
